SUNeVision Holdings Ltd. announced its interim results for the six months ended 31 December 2022. During the period under review, SUNeVision's revenue increased 11% year on year (YoY) to HK$1,108 million, as a result of increased demand from new and existing customers. Over the past six months, connectivity demand remained robust, and multiple clients increased their presence at MEGA-i. This strong momentum was also seen in the demand from cloud players, with multiple cloud clients having increased their presence in SUNeVision facilities, and some are already planning for the next wave of expansion with state-of-the-art data centre equipment.

Looking ahead, the construction of MEGA Gateway in Tsuen Wan was completed, adding approximately 200,000 square feet GFA and 20 MW IT load to SUNeVision's data centre portfolio. Today, more than 60% of the space was committed by customers. MEGA IDC, SUNeVision's flagship greenfield project in Tseung Kwan O, will see the completion of Phase 1 (approximately 500,000 square feet GFA and 50MW IT load) by the end of 2023. The total gross floor area of SUNeVision's data centres in Hong Kong will grow from 1.5 million square feet as at 31 December 2022 to almost 3 million square feet, and its power capacity will increase from 80MW to over 280MW.

數碼通公布2022/23年度中期業績

SmarTone Telecommunications Holdings Limited announced its interim results for the six months ended 31 December 2022. During the period under review, service revenue and service EBITDA increased 4% and 2% YoY respectively, driven by strong core local service business and reinforced by a recovery in roaming revenue, which further accelerated from the end of December. Profit attributable to equity holders increased slightly to HK$256 million from HK$251 million in the same period last year.

SmarTone saw continuous growth in 5G subscriptions, supported by a modest recovery in roaming revenue as Covid restrictions were gradually relaxed in the last few months of 2022. The customer base of SmarTone's 5G Home Broadband business continued to grow strongly, together with the growth in the Enterprise Solutions portfolio, which also contributed to growth in revenue. SmarTone's 5G provides exceptional coverage to over 99% of the city's population. Even with the already expansive coverage, the Company continued to invest, and SmarTone's 5G network now extends, for instance, to the new Tseung Kwan O – Lam Tin Tunnel and the Cross Bay Link. SmarTone is also one of only two operators that provides 5G coverage along Route 3, a crucial highway to the Northern Metropolis.

Looking ahead, the reopening of Hong Kong and recently of China is a big boost for SmarTone's roaming revenue, which recorded rapid uptake in January 2023. SmarTone's roaming revenue rebounded to nearly 70% of the pre-pandemic level in January alone, and has continued to show strong growth. SmarTone also expects to continue to see positive uptake of 5G, together with healthy growth of its 5G Home Broadband business. SmarTone will continue to invest in building a world-class digital infrastructure to reinforce Hong Kong's development as a technology hub and further supporting the city's integration with China and the Greater Bay Area.
