Over 6,000 students from more than 500 kindergartens, primary and secondary schools have joined the Sun Hung Kai Properties International Youth STEAM Education Competition 2026, title sponsored by SHKP and organized by the International Youth STEAM Education Association. The competition was designed to encourage students to explore the applications of artificial intelligence (AI) and other innovative technologies. The award presentation ceremony was recently held.

SHKP Executive Director Christopher Kwok stated, “SHKP has always actively invested in technological infrastructure, promoted collaboration among industry, academia and the research sector, and supported AI development and smart city initiatives. This competition provides a valuable platform for students to translate STEM knowledge into practical applications, laying a solid foundation for their future careers in innovation and technology. I am particularly pleased to see this year’s event expanded into multiple cities across the Greater Bay Area, deepening regional exchange and cooperation in innovation and technology education.”

As one of Hong Kong’s most representative inter-school innovation and technology competitions, the event covers seven major categories, including AI and robotics, and 15 popular, cutting-edge tech subjects, showcasing students’ creative achievements in innovation and technology.

由新地冠名赞助、国际青少年创科教育协会主办的“新鸿基地产国际青少年创科教育大赛2026”吸引来自超过500间幼稚园及中小学的逾6,000名学生参加。此赛事鼓励学生探索人工智能及创新科技的应用，其颁奖典礼于日前举行。

新地执行董事郭基泓表示：“新地一直积极投资科技基建，推动产学研合作，支持人工智能发展和智慧城市建设。这次赛事为学生提供宝贵平台，将STEM知识转化为实际应用，并为未来投身创科发展奠定基础。特别高兴见到这届赛事扩展至大湾区多个城市举行，深化区域创科教育交流与合作。”

该比赛被誉为香港学界“创科奥运会”，是最具代表的创科赛事之一，涵盖人工智能、机械人等七大类别、15个热门前沿科技项目，全面展现学生在创新科技领域的创意成果。
